Professional Summary

Results-driven technology and business professional with over 5 years of multidisciplinary experience across software engineering, data analytics, cloud infrastructure, and technical education. Proven track record in delivering scalable enterprise solutions leveraging MERN stack frameworks, AWS cloud services, and financial systems integration. NJDOE-certified in Computer Science education, with demonstrated expertise in workforce development and technology enablement. Committed to fostering applied learning through strategic mentorship and peer collaboration, while championing institutional excellence and ethical leadership in all business and technology initiatives.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript

Frameworks/Tools: React, React Native, Spring Boot, Hibernate, Angular, Docker, Kubernetes, Git, Node.js

Cloud/Databases: AWS (Lambda, ECS, S3, DynamoDB, RDS, EC2, API Gateway, Route 53), GCP, PostgreSQL, MySQL, MongoDB

APIs/Testing: REST, SOAP, GraphQL, OAuth 2.0, JWT, JUnit, Cucumber, Cypress, Playwright, Postman

Methods: Agile, Scrum, TDD/BDD, Microservices, Serverless Architecture

Experience

To my future employer: I hope you are visionary enough to see not just what I build today, but the future we can create together.

Amazon

Hicksville, New York, USA

L1 Associate

Jun 2025 – Present

- Operated advanced warehouse management systems, handheld scanners, and automation tools to execute high-volume order fulfillment, enforce safety and quality compliance, and optimize logistics workflows.
- Execute order fulfillment operations by receiving, stowing, picking, packing, and shipping customer orders using handheld scanners, warehouse management systems, and automated inventory technology.
- Perform product handling and logistics tasks, including moving, sorting, staging, and lifting items (up to 49 lbs) across dynamic workflows in a high-volume, fast-paced environment.
- Maintain operational excellence and safety compliance by adhering to Amazon security protocols, quality standards, and equipment handling procedures.
- Support continuous performance goals through sustained productivity, attendance, and teamwork while performing extended physical activities during 10–12 hour shifts.

Babson Acquisition Partners Inc.

New Jersey, USA

Barista & Baker

Apr 2024 – Mar 2025

- Baked croissants, developed customer service soft skills, and crafted custom flavor offerings for customers.

Burpez

Newark, New Jersey, USA

Software Engineer

Apr 2024 – Apr 2025

- Built a cloud kitchen management platform using the MERN stack, integrating user research to optimize workflows.
- Developed a React frontend, Node.js/Express backend, and MongoDB database for efficient order handling with scalable REST APIs.
- Designed modular React interfaces with Redux state management and real-time updates using AWS Kinesis for order and inventory streaming.
- Developed scalable Node.js services using Express and MongoDB, optimizing data queries and response payloads for 5,000+ daily users.

Vanguard

Malvern, Pennsylvania, USA

Software Engineer

Mar 2023 – Nov 2023

- Developed and automated ETF primary market trading systems using AWS ECS, Lambda, and CodeDeploy with blue-green deployments.
- Managed containerized microservices with Docker, ensuring scalability and fault tolerance.
- Engineered backend REST APIs for asset management tools using JavaScript and PostgreSQL, integrating AWS CloudWatch and API Gateway.
- Implemented automated testing pipelines with Mocha and Postman, increasing test coverage from 45% to 85% in under two quarters.

Mercedes-Benz Financial Services

Farmington Hills, Michigan, USA

Technology Analyst

May 2021 – Mar 2022

- Migrated SOAP APIs to RESTful microservices for Daimler Truck Financial Services using Java/Spring Boot, reducing response time by 30%.
- Automated testing and deployment with JUnit and CI/CD while supporting ServiceNow setup and migration.
- Supported financial transaction processing for customer accounts, ensuring data accuracy and timely service delivery.
- Partnered with internal finance and account teams to streamline service escalations and improve customer lifecycle operations.

Industry Mojo

Short Hills, New Jersey, USA

CRM and Data Operations Intern

Jan 2020 – Jan 2021

- Developed and tested a web portal using HTML, CSS, and JavaScript, improving client knowledge base settings.
- Automated product price list entries in Microsoft Dynamics 365, improving data accuracy and operational efficiency.
- Collaborated in a Scrum environment to implement customizations that optimized Dynamics platform workflows.

Education

New Jersey Institute of Technology

Newark, NJ

M.S. in Information Systems

Jan 2019 – Dec 2020

Savitribai Phule Pune University

Pune, India

B.E. in Electronics and Telecommunications

May 2013 – Jun 2017

Certifications

AWS Certified SAP-C02 — Praxis Computer Science (5652) — NJDOE Licensed Computer Science Teacher
